Professional Lake Management Planning Services

Dear Lake Shore Property Owner,

June 10, 2025

The intent of this letter is to notify you that the Callahan-Mud Lake Protective Association (CMLPA) has hired Northern Aquatic Services, an herbicide application company, to treat Eurasian watermilfoil (EWM), a non-native, invasive aquatic plant species that is found in both Callahan and Mud Lakes. An herbicide application of 4.2 acres will be completed on Callahan Lake (between the two lakes) in 2025 if the WDNR approves a permit request. The Trade Name herbicide to be used to treat EWM is "ProcellaCOR EC". This herbicide has been labeled for aquatic use by the Environmental Protection Agency. Any water usage restrictions for the treated area will be posted on yellow signs in the treated areas. Herbicide application is expected to take only an hour or two and will be completed sometime between June 20 and July 15, 2025.

In addition, the CMLPA will be contracting with Aquatic Plant Management, LLC to complete scuba diver or diver-assisted suction harvest (DASH) near the dam on Callahan Lake sometime between late June and early August.

You may view a copy of the application at the following website:

<https://callahanandmudlake.org/current-planning-documents-for-aquatic-plant-management/>

Aquatic plant survey work will also be completed in both lakes in 2025 to further map the distribution and density of EWM in both lakes. These surveys will support future management of EWM.

Questions concerning the treatment can be directed to Roger Amundson, Treasurer of the CMLPA at 715-462-3154, Dale Dresser of Northern Aquatic Services at 715-495-5252, Scott VanEgeren of the Wisconsin DNR at 715-471-0007, or Dave Blumer from Lake Education and Planning Services at 715-642-0635. A chemical fact sheet and herbicide label is available upon request.

Sincerely,

Dave Blumer
Lake Education and Planning Services
